

Fox Eradication Program

Foxes are a highly invasive and elusive predator that pose a real & serious threat to our wildlife, agriculture & environment. In response to widespread evidence of fox activity, **DPIPWE's Fox Eradication Program** will be targeting core fox habitat within Tasmania with a strategic fox baiting program.

To help **keep you informed about the fox eradication effort**, a series of public information sessions will be held to provide the following:

- 🦊 **Overview of fox baiting programs for southern Tasmania**
- 🦊 **Update on physical evidence of fox activity in Tasmania**
- 🦊 **Information on post-baiting fox monitoring activities**

These sessions will also offer the **opportunity for questions** about planned operations to be raised. All members of the public are invited to attend and **community support will be vital** for the success of the fox eradication effort.

Southport: Southport Community Centre **15 March, 7.30-9.00pm**
